

LIQUID HANDLING SOLUTIONS

MODULAR, FLEXIBLE, UPGRADABLE

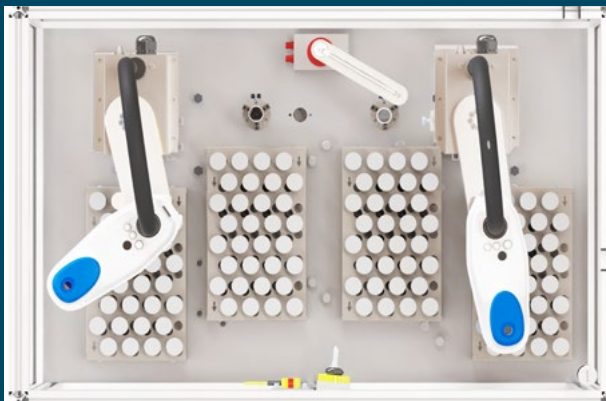

Tube Transfer System

- Pipetting
- Decapping & Capping
- Labeling
- Dispensing
- PH Measuring
- & many more

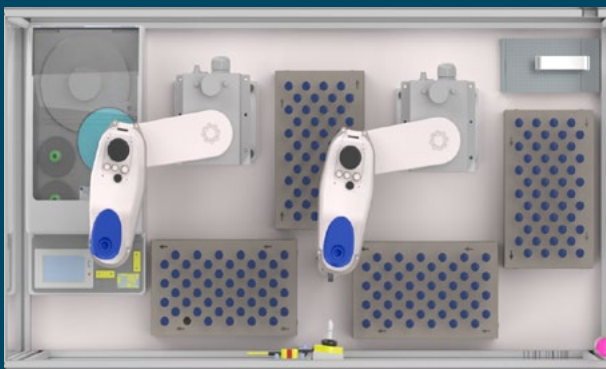

APPLICATION EXAMPLES

VIRAL SAMPLE TRANSFER FOR PCR TESTING

ICP SAMPLE PREPARATION WITH PH MEASUREMENT

LABELING, DISPENSING AND LIMS INTEGRATION

TAILORING SOLUTIONS

By selecting from a wide range of robotic modules options and accessories you can customize your TTS to suit the evolving needs of your laboratory.

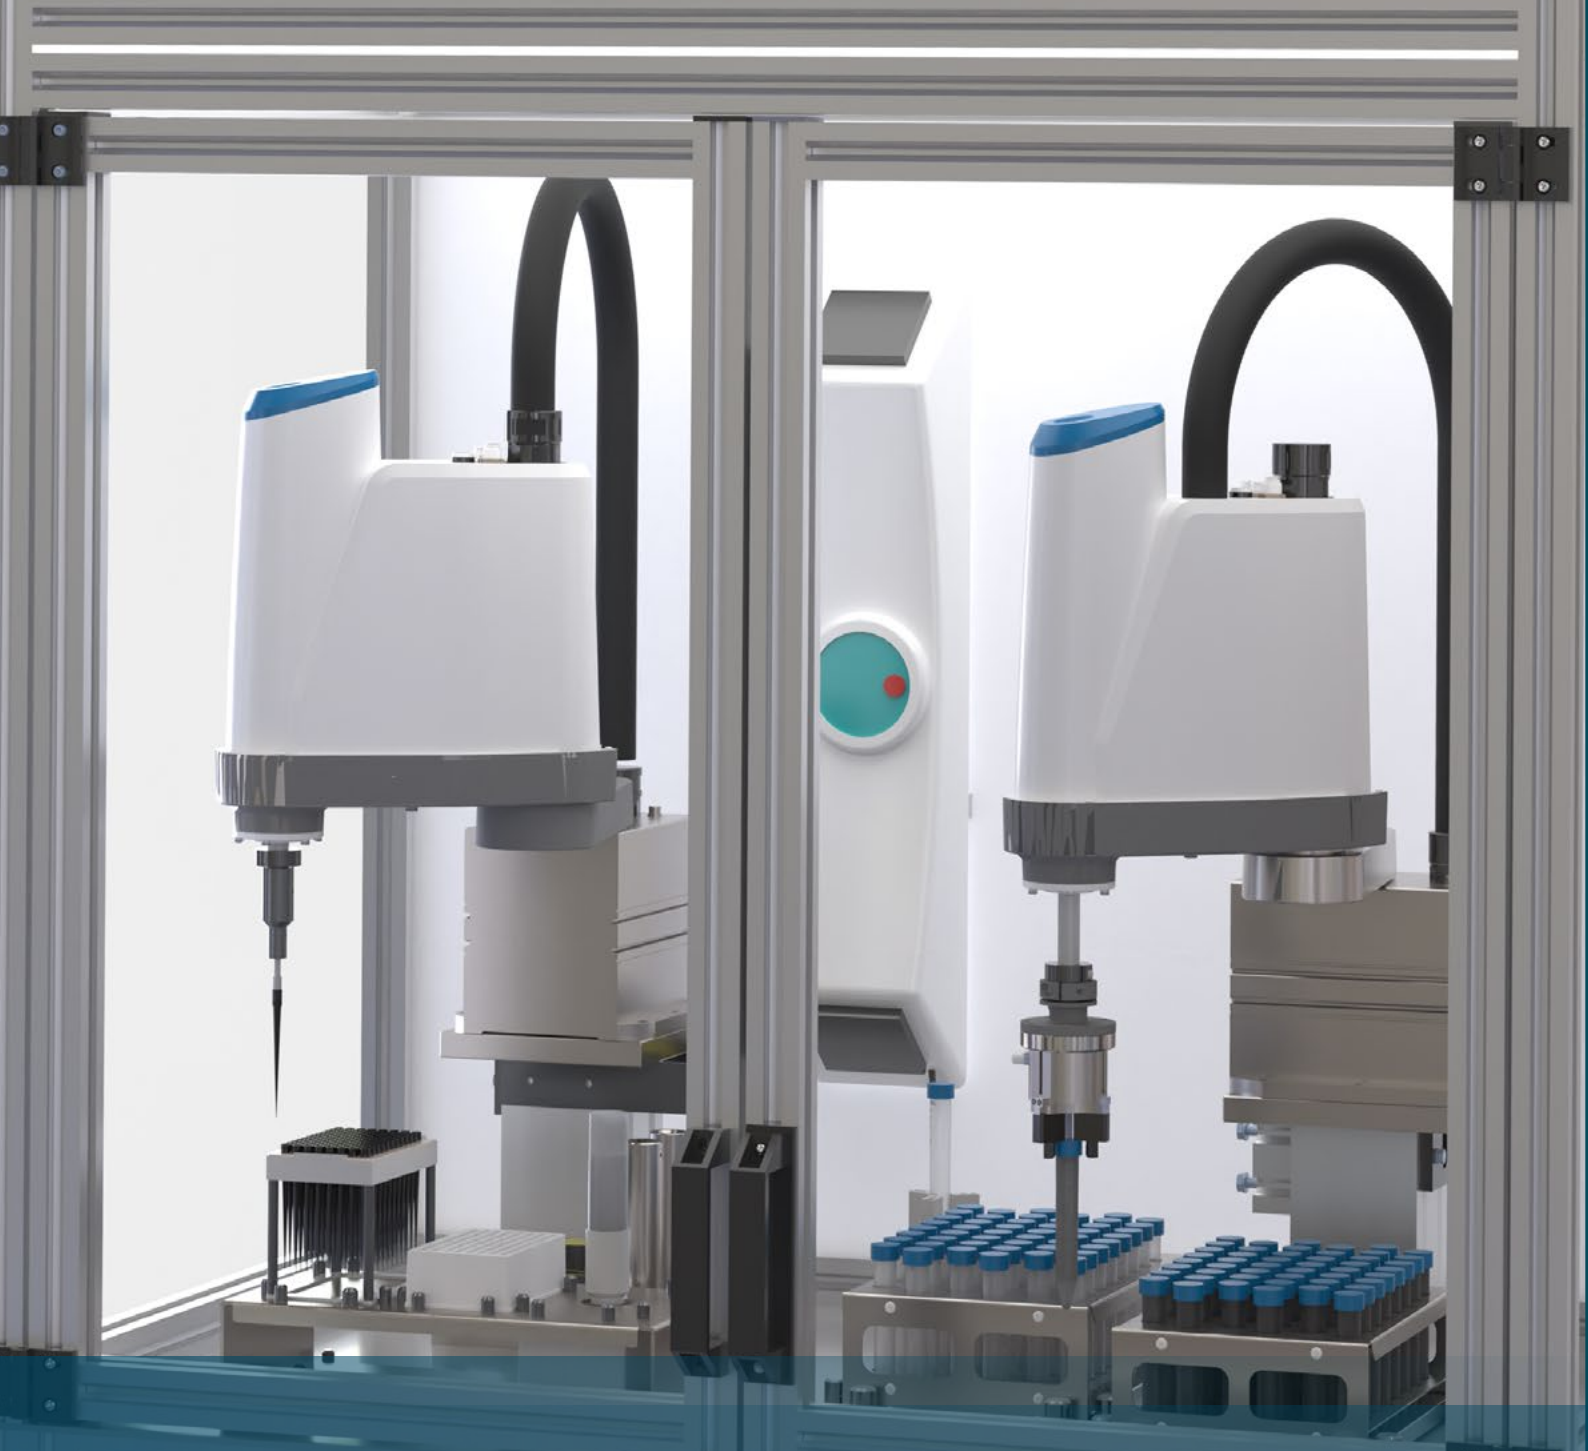

In most cases you can change the configuration in the future by upgrading.

WHY CHOOSE OUR SOLUTIONS?

- **ENHANCED PRECISION:**
Eliminate human error and achieve consistent, accurate results
- **INCREASED EFFICIENCY**
Accelerate your processes and boost your productivity
- **FUTURE PROOF TECHNOLOGY:**
Stay ahead with state of the art automation tailored to your needs

CURIOUS TO LEARN MORE?

- **LIVE DEMONSTRATIONS:** See our technology in action with a personalized demo.
- **FLEXIBLE LEASING OPTIONS:** Discover affordable leasing plans to fit your budget.
- **HIRING SOLUTIONS:** Access our automation solutions without long-term commitment

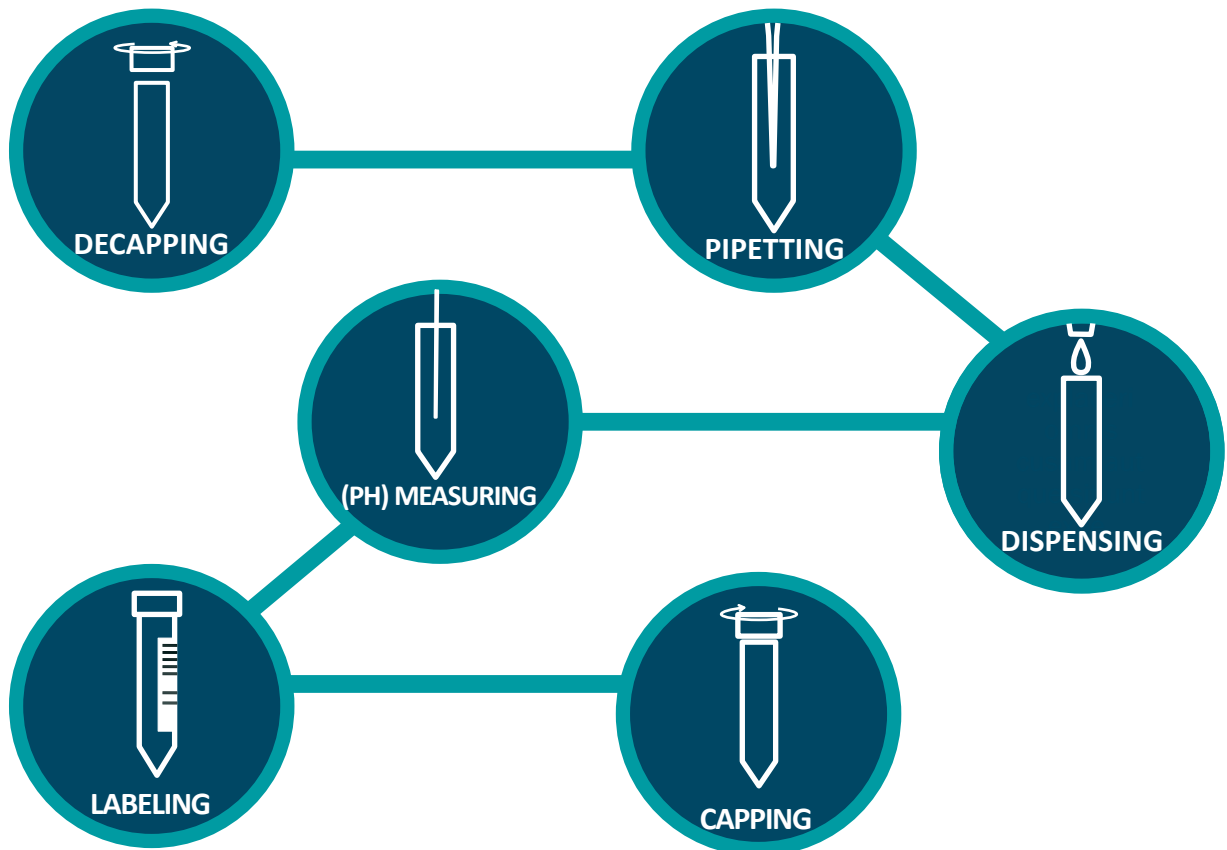

Our TTS system offers a comprehensive solution to manage a wide range of workflows across multiple disciplines.

When paired with various modules such as a barcode labeler/ printer, HEPA filtration, our TTS workflow can achieve complex automation, encompassing tasks such as pipetting, decapping, labeling, and dispensing at a wide range of environment request.

This single system can be tailored to meet your specific requirements and supports a diverse array of tubes, vials, and plates

What is your desired workflow?

The TTS system can be tailored to meet your specific requirements and supports a diverse array of tubes, vials and plates.
